

## **William Lynn**

### **BIOGRAPHY**

Will Lynn has deep expertise in the strategic, economic and commercial aspects of reducing carbon emissions and dealing with the consequences of climate change having worked on a wide range of carbon strategy projects, not only with major companies but also with technology start-ups and public bodies.

Will has spent the last five years working exclusively in the carbon and climate change space, advising leading companies and governments in a range of countries (especially in Europe and Africa) on the strategic issues around carbon abatement and water scarcity. He has been working with one of the world's leading oil majors as well as a range of large companies in the power, consumer goods and carbon credit sectors. He has a deep knowledge of carbon management and climate change and a detailed understanding of the oil industry in particular, including the refining segment and the potential impact of carbon management and climate-related issues on the industry as a whole.

Prior to co-founding Irbaris, Will was a senior consultant at LECG and a consultant at Cairneagle Associates, a boutique strategy consulting and investment firm. Will has also previously worked for Ove Arup & Partners.
